

A man with grey hair, wearing a dark green t-shirt and blue jeans, is kneeling and using a green and red power drill to assemble a white metal frame. He is looking towards the camera with a slight smile. In the background, there is a large cardboard box with the 'fermob' logo on it. The scene is outdoors, with a paved ground and some foliage visible in the distance.

fermob

SYMBOLS

PROTECTION		Very High Protection	RESISTANCE		UV-Resistant	MARKET		Commercial use	COLOURS		No. of available colours for the product		Suitable for outdoor use with characteristics depending on the product
		High Protection			Water-repellent fabric			Garden Centers					
CHARACTERISTICS		Knockdown											
		Fold-away tops											
		Product fitted with silencing pads											

SILENCING PADS: FERMOB HAS DEVELOPED THE ULTIMATE NOISE REDUCTION SOLUTION.

The silencing pads are an exclusive, patented technology that allows furniture to slide effortlessly across the floor and features an integrated shock absorber to reduce vibrations.

Comes as standard on Luxembourg, Croisette, Pétale, Stripe and Luxembourg Kid table, and *Facto* on request

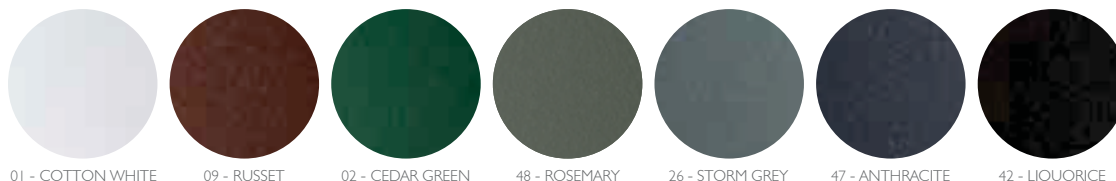

**NOISE REDUCTION OF 14 dB
= 10 TIMES QUIETER!**

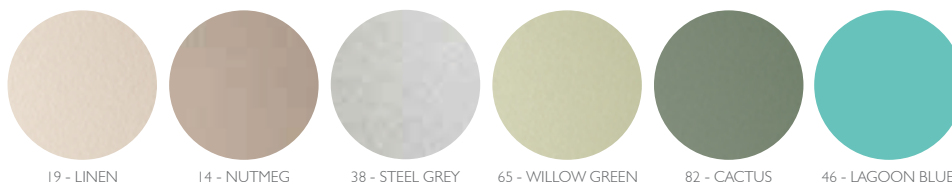

OUR TIPS FOR CREATING EFFORTLESS COLOUR COMBINATIONS

24 COLOURS, 4 CATEGORIES

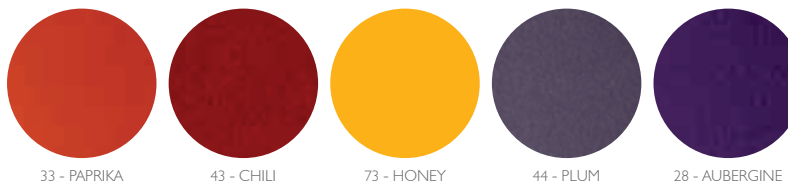

BASICS: NEUTRAL COLOURS THAT ARE USED MOST FREQUENTLY FOR TABLES

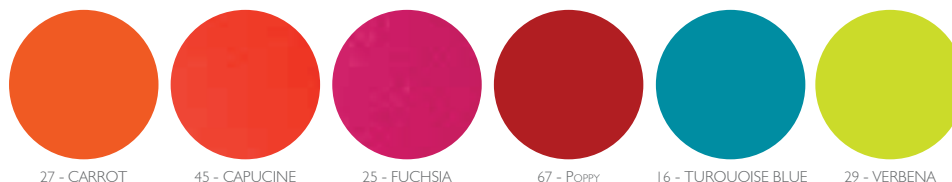

PASTELS: COLOURS THAT SOFTEN EVERYTHING AND PROVIDE BREATHING SPACE

INTENSE COLOURS: COLOURS THAT ADD DEPTH TO YOUR SET

BRIGHT COLOURS: BRIGHT COLOURS THAT REFLECT LIGHT

FOR A WINNING COLOUR COMBINATION:

Create your set with: **1 BASIC + [1 PASTEL OR INTENSE COLOUR] + 1 BRIGHT COLOUR**

Never exceed more than
3 colours in the same set.

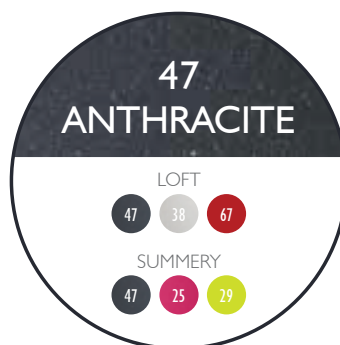

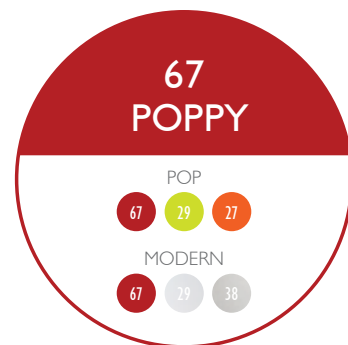

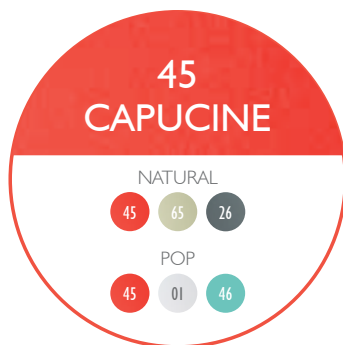

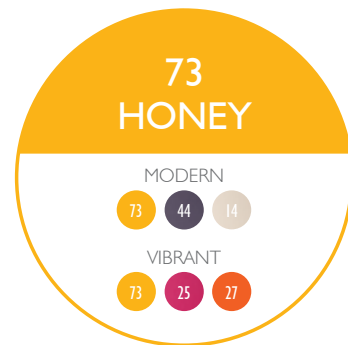

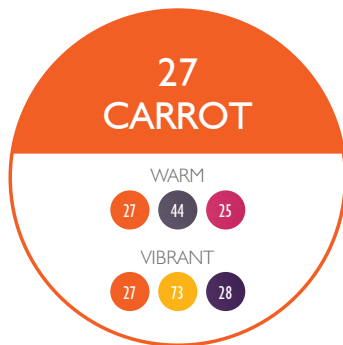

Repeat the
table colour on a few chairs.

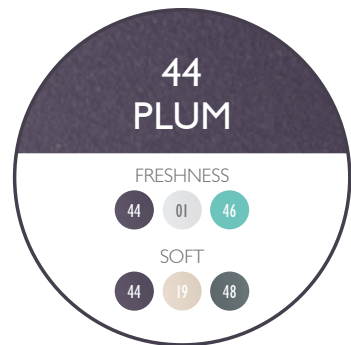

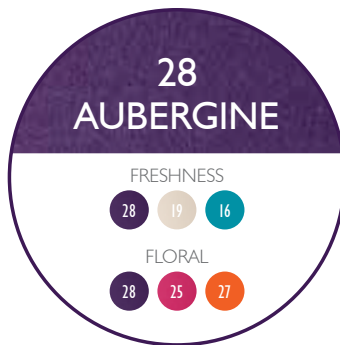

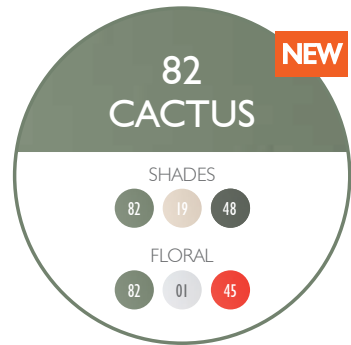

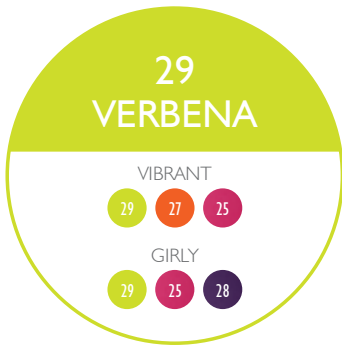

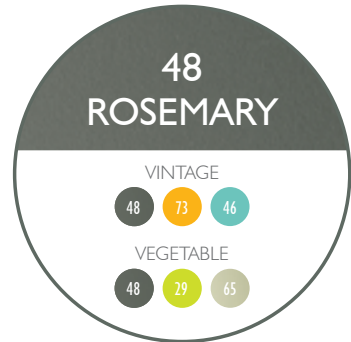

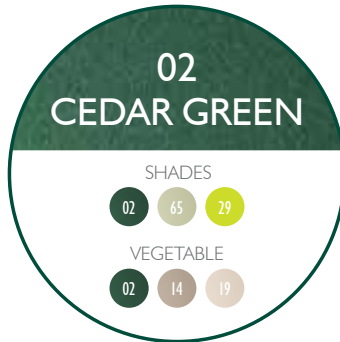

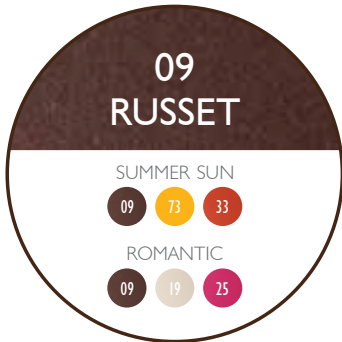

OR

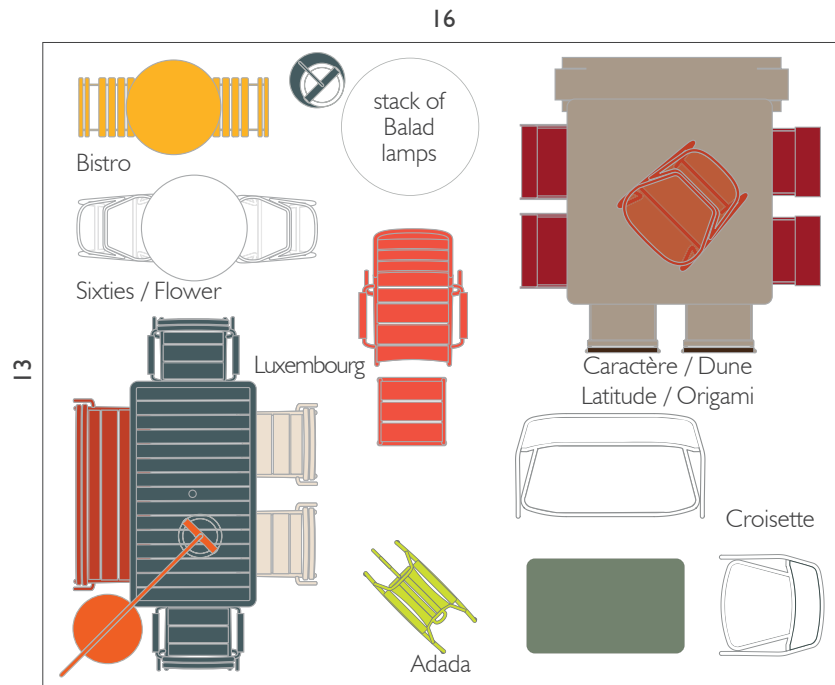

Go for a
100% monochrome look!

ABOUT
FERMOB

FERMOB: NO.1 FOR COLOURFUL, METAL OUTDOOR FURNITURE

For more than 25 years, Fermob has been designing and manufacturing metal outdoor furniture that is accessible and full of joie de vivre - perfect for anyone wishing to create a stylish, relaxing and friendly garden. Fermob furniture stands out from the crowd thanks to its original, patented designs and extensive range of colours. Fermob works with renowned designers who create original and exclusive products for the brand, protected by copyright. The name of the designer can be found alongside each item of furniture.

Drawing on its outdoor know-how and colour expertise, Fermob has also developed the Les Pièces Rapportées collection – outdoor lifestyle accessories that are perfect for creating truly liveable spaces. In doing so, Fermob redesigns gardens and terraces from top to bottom, with coherence and beauty being the key-words. Fermob is much more than a manufacturer. It is your very own outdoor space designer.

FERMOB: MATERIALS AND TREATMENTS FOR OUTDOOR USE

For its furniture, Fermob chooses to use metal (steel or aluminium) – the "ideas material", as Gustave Eiffel put it – won over by its incredible versatility. The metals we use are top-grade steel and aluminium. Fermob furniture can be either exclusively metal or a combination of metal and OTF (Outdoor Technical Fabric, a type of PVC-coated polyester), woven polymer (Sixties), or outdoor fabrics developed in conjunction with top-quality, renowned suppliers such as Ferrari and Dickson.

STEEL

ALUMINIUM

STEEL AND OUTDOOR
TECHNICAL FABRIC

ALUMINIUM AND
OUTDOOR TECHNICAL
FABRIC

ALUMINIUM AND
WOVEN POLYMER

Fermob furniture is subject to intensive tests according to general safety (NF EN 581-1), stability (EN 1022) and mechanical security standards for collective use (NF EN 581-2, EN 581-3). It also benefits from special anti-corrosion treatment for outdoor use. Two treatments are offered: the first is the High Protection treatment, which can be further improved with the second treatment, the Very High Protection treatment, which provides optimum protection for steel furniture that is constantly exposed to very wet, humid or salty conditions. The paint used is a 100% polyester, anti-UV powder paint, subject to standard tests for baking, hardness, resistance to scratches and corrosion. It is applied electrostatically to the furniture for optimal coverage, and then baked at very high temperature.

For its Les Pièces Rapportées collection, Fermob has opted to work with experts, applying a similar approach to that adopted for its furniture. It reflects the fundamental values of the brand: creativity, design, technical sophistication and colours. A range of innovative, refreshing new products are developed each and every season. The Les Pièces Rapportées collection is a guarantee of quality, with all products designed for 100% outdoor use.

Its lighting, the Balad lamp with High Protection treatment, is subject to the same legal guarantees as all products of this type. It meets standards NF EN 60529 and NF EN 50102 giving degrees of protection IP 44 and IK 10, for guaranteed outdoor use.

FURNITURE THAT MAKES ITS MARK ON PEOPLE'S MINDS, NOT ON NATURE

Fermob furniture is designed for natural environments and is made using materials and processes that respect the environment.

METAL: AN ENVIRONMENTALLY FRIENDLY CHOICE

Some 98% of all iron and aluminium is now recycled worldwide.

This means that Fermob can guarantee that its furniture is fully recyclable.

ECOLOGICAL PAINT THAT PROTECTS BOTH THE ENVIRONMENT AND YOUR HEALTH

The powder paints used by Fermob contain no solvents. They are 100% recycled and recyclable.

They are applied in a zero-waste facility, with multiple successive steps for guaranteed outdoor use.

RECYCLED FABRICS

To procure its Outdoor Technical Fabrics (OTFs), Fermob selects only the most rigorous suppliers in terms of sustainable development. Ferrari, a French manufacturer and the main OTF supplier, has committed itself to a unique, patented recycling process – Texyloop® – which guarantees that 100% of the fabric constituents are recycled.

This approach means that:

- OTF offcuts are salvaged and recycled.
- Fabrics are recycled when they reach the end of their lifespan.

RECYCLED AND RECYCLABLE PACKAGING

Fermob has been participating in the Eco-Emballages ("Eco-Packaging") program for many years now.

CONTINUALLY IMPROVING TO REDUCE OUR ENVIRONMENTAL IMPACT

Optimising energy consumption remains one of Fermob's key concerns, as regularly demonstrated through concrete action such as regular reductions in the temperature of our paint ovens (-50°F in 25 years), using low-consumption baking (-10%) and investing in a new painting line, saving 8 tons of powder per year.

ECO-DESIGNED FURNITURE

The design and aesthetic qualities of Fermob's creations, together with their lightness and resistance, are also solutions to key environmental challenges: saving materials and limiting waste as well as transport impact.

INTENTIONS BACKED UP WITH ACTIONS

Since 2009, ISO 14001 certification of our production site has been recognising all these efforts towards sustainable development. This certification requires an annual audit renewal every three years.

HIGH PROTECTION TREATMENTS FOR OUTDOOR USE

Fermob furniture benefits from anti-corrosion treatment, ensuring it can withstand the elements all year round. The paint used is a 100% polyester, anti-UV powder paint, which is applied electrostatically to the furniture for optimal coverage, and then baked at very high temperature.

Depending on the colours, there are two types of finish: flat satin or matte textured. Some of these finishes are extremely bright in appearance, including aluminium or pearl particles.

HIGH PROTECTION TREATMENT.

This High Protection treatment is applied as standard on a wide range of Fermob products.

VERY HIGH PROTECTION TREATMENT.

This Very High Protection Treatment provides optimum protection for steel furniture. It is applied as standard on certain items of furniture, and can be applied to any product on request, subject to certain conditions:

- Takes an extra 10 working days
- 18% supplement on the catalogue price
- Catalogue price and a minimum charge of \$107 net

Each item of furniture features symbols indicating the degree of protection, based on its material (steel or aluminium) and treatment level.

Integrated handle and locking key
Can accommodate parasol poles from Ø 0.748" to 2.165"
and parasols of up to Ø 118" (or 118" x 118")

Our COLLECTIONS

the 1990s, the number of people in the world who are under 15 years of age is expected to increase from 1.1 billion to 1.5 billion.

As the world's population grows, the demand for food and other resources will increase. This will put pressure on the environment and on the world's food supply.

One way to meet this demand is to increase the amount of food that is produced. This can be done by using more land for agriculture, by using more water, or by using more fertilizers.

Another way to meet this demand is to increase the efficiency of food production. This can be done by using better farming techniques, by using better seeds, or by using better fertilizers.

There are many ways to meet the world's growing demand for food and other resources. It is up to us to decide which way is best.

One of the most important things we can do is to make sure that we are using resources wisely. This means that we need to be careful about how we use land, water, and fertilizers.

Another important thing we can do is to make sure that we are using the best farming techniques. This means that we need to be careful about how we plant our crops and how we care for them.

There are many other things we can do to meet the world's growing demand for food and other resources. It is up to us to decide which way is best.

Les PIÈCES RAPPORTÉES

the 1990s, the number of people in the world who are under 15 years of age is expected to increase by 1.5 billion, from 1.1 billion in 1990 to 2.6 billion in 2015.

As the world's population grows, the demand for food and other resources will increase. This will put pressure on the environment and on the world's food supply.

One way to meet this demand is to increase the amount of food that is produced. This can be done by using more land for agriculture, by using more water, or by using more fertilizers and pesticides.

Another way to meet this demand is to reduce the amount of food that is wasted. This can be done by improving the way that food is stored and distributed, or by changing the way that people eat.

There are many ways to meet the world's growing demand for food and other resources. It is up to us to decide which way is best.

One of the most important things we can do is to make sure that we are using resources in a sustainable way. This means that we are using resources in a way that will not harm the environment or the future generations.

There are many things we can do to make sure that we are using resources in a sustainable way. We can reduce the amount of waste that we produce, we can use less energy, and we can use less water.

By making these changes, we can help to make sure that the world's food and other resources will be available for everyone in the future.

It is our responsibility to make sure that we are using resources in a sustainable way. We must act now to make sure that the world's food and other resources will be available for everyone in the future.
